Welcome to PhoneOnBoat.com (a specialized service from telecodex.com) we will put a real phone services for inbound and outbound calls on your boat making possible for your family, friends or customers able to reach you as a local call, we can forward numbers for more than 225 cities around the world to your softphone on your boat !! check on coverage link for a complete list. Boat Owner doing charter will simply fall in love with us.

We can assign as many numbers as you want or even toll free number at low cost those numbers will ring your softphone on your boat, if you are not online your voicemailbox will answer, the peoples calling you will call you as local call if their area city code is the same as your virtual area code phone number, don't forget you have one phone number included in the plan with your account, just mention wich citiy you are interested in when contacting us.

SPECIAL PROMOTION GET 1 Week Communication FREE to try !!! we will give you information regarding a free account for one week just contact us with the form contact-us you can then go to the download and config section to start communicate for free for one week after receiving your free account information if you know us by an agent please provide the name of the agent who did refer you to us.

We are located in Montreal Canada, Our Network is redundant, our climatized park servers can run 24h on UPS and by then a generator can run several weeks.

We are terminating calls with voipjet on their amazing network they have servers in new-york on level 3 bandwidth on one of the largest communications and Internet backbones in the world. They have also others servers on the US East Coast on the highly peered Nac Network and finally, servers at Los Angeles on Level(3) bandwidth..

What u need :

- 1) You need an internet connection, Wi-Fi connection class B will be more than enough, most of the marina and port world-wide are now offering internet services across bay and marina sometimes for free or at low cost.
- 2) You need to install a small software wich register to our servers to be able to use our network, this software is available for windows, Linux or Mac.
- 3) You need to have a valid account with us

Once you have this depending of the plan you have choosen, you can call and receive call directly from your boat.

we can assign you a number of any major cities around the world (see coverage)

all account provide a bundle of free services:

- Voice mailbox linked to your email so if u are not online and someone call your number the call will be sent to your voicemailbox and after the recording a copy of the message wil be sent to your email. Furthermore you can take your messags from your softphone or retrieve it on a nice interface on our website or listen to it in your email.
- All the boats registered with us can communicate with each other for free no matter where you are locating
- Teleconferencing
- Caller Display
- 2 Lines per number
- Music on Hold etc
- All those features are free and provided with your account : Blacklist Blacklist a number *30Blacklist the last caller *32Remove a number from the blacklist *31----- Call Forward Call Forward All Activate *72Call Forward All Deactivate *73Call Forward All Prompting Deactivate *74Call Forward Busy Activate *90Call Forward Busy Deactivate *91Call Forward Busy Prompting Deactivate *92Call Forward No Answer/Unavailable Activate *52Call Forward No Answer/Unavailable Deactivate *53----- Call Waiting Call Waiting - Activate *70Call Waiting - Deactivate *71-----
